Air Volume Control Damper IRIS

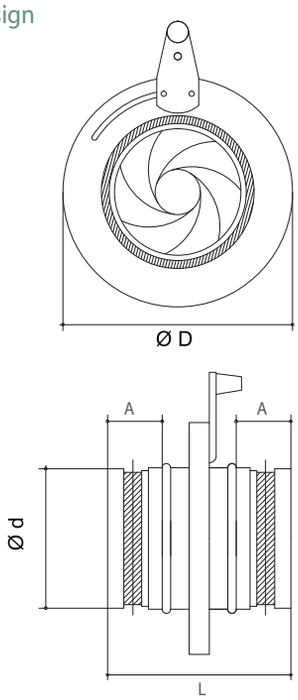

Description
Iris diaphragm damper allows adjustment of the air flow by measuring pressure at two points. .

Application
Adjustment of the air flow in ventilation and air conditioning systems.

Characteristics
The damper is provided with an iris diaphragm, pressure measuring points, operating lever and fitting gaskets.
Various levels of blade opening.
The iris is adjusted by operating lever.
The damper is delivered along with a selection chart (pressure loss/ air flow).

Materials and finishing
Galvanized steel sheet
Plastic adjustment device

Technical design
