Flexible Ducts

Description
Aluminum flexible duct used in ventilation and air conditioning installations.

Application
Supply/ exhaust of the air.

Characteristics
Flexible tubing is available both non-insulated and insulated.
The standard length is 10 m/pc.
Fiberglass insulation.
The temperature range is - 30°C ÷ 140°C.
Maximum velocity is 20 m/s.
Not suitable for air transport with high concentration of acids and bases or for discharge of combustion gases.
